Technology: RTK Query, Better Auth, MongoDB, React, Typescript

My Role: All of design and development

Description: Custom expense tracker and budgeting tool

WORK EXPERIENCE

DeadEasy

San Diego, CA May 2025 - Present

Title: Frontend Engineer

Description:

- Develop and enhance frontend features of React UI utilizing MUI, React Hook Form, and TypeScript.
- Build efficient and scalable interfaces with Vite as the build tool, ensuring seamless integration with backend services via GraphQL API.

LunaDNA

San Diego, CA September 2019 - November 2023

Title: Front-end Engineer

Description:

- Develop and enhance frontend features of React UI utilizing MUI, React Hook Form, Redux, and Vite.
- Created custom NPM package for shared UI components using GitHub packages and Jenkins for automated versioning.
- Supported Backend team by creating and building API routes in .NET and updating auth flows in Identity Server 4.
- Collaborated with the marketing department in advertisement creation, partner integrations into the platform, and site analytics using Google Analytics.

Trilogy Education

San Diego, CA July 2018 - August 2019

Title: Teaching Assistant

Description:

- Provide students with personalized support in debugging code and developing a developer mindset.
- Evaluate and grade student assignments accurately and fairly according to established criteria.
- Facilitate smooth lesson delivery by assisting the instructor and supporting students during in-person classes, ensuring an effective and engaging learning environment.

AVID Center

San Diego, CA January - June 2019

Title: Web Support Specialist

Description:

- Troubleshoot and resolve user-reported issues within an internal web application.
- Oversee and prioritize the team's backlog to align development efforts with project goals.
- Designed and developed detailed sitemaps using Microsoft Visio for system visualization.
- Created an Azure Function to integrate with the Microsoft Graph API, enabling automated addition of members to Microsoft Teams.

Paradeigm

San Diego, CA August - October 2018 and April - August 2019

Title: Full Stack Developer

Description:

- Maintain, enhance, and implement new features for websites built on the MERN stack.
- Extend and improve a mobile application developed with React Native.
- Collaborate closely with project managers and clients to plan development priorities and ensure effective communication throughout the project lifecycle.
